Categories: Flat Panel Ground Mounts, Flat Panel Mounts

The product confirms Euromet's characteristics of stability and practicality and combines it with a strong, recognizable and captivating design.

It is a monitor stand with wheels in the shape of a DELTA stand. It can become MAXI, in the case of screens up to 90 inches and very heavy weights.
The model fully meets the needs related to the use of interactive whiteboards and touch screens, that is, safety in movement and transport in different environments. The footprint is minimal, thanks to the closing system of the feet which, through the internal cable glands, protect, distance and hide the connection cables of the monitor and applied instrumentation. The wheels are easily lockable and can also be replaced to transform the trolley into a stand.

The large shelf is functional to support computers and other tools, while the camera support/videoconferencing system is integrated into the tripod and allows perfect adjustment both above and below.
