Thickness	1,5/2 mm tubes – tubes
DIAGONAL OF THE MONITOR	42''-52''
Material	Fe
Treatments	Black

Categories: Flat Panel Mounts, Flat Panel Wall Mounts

Colour: Black

Fix Universal Plasma wall bracket, in steel plate. The bracket is composed of two plates: the first is to be fixed to the wall (365x605mm) and the other to the monitor (850x590mm). It is compatible with all models and brands of plasma (from 42'' to 55'') thanks to the "sliding buttonholes system" that cover a horizontal 284-700mm distance and a 80-475mm vertical one. Thanks to that system after you have fixed the plasma you can centre it to hide the wall plate. The equipment includes 6 "jolly plates" with the hole or M5-M6-M8-M10 screws that centre the fixing screw to the plasma. The PVC insert grants the isolation of the bracket from the plasma. In the inferior part two security screws have been inserted to avoid attempts of stealing the plasma. Within the equipment 6 M5-M6-M8-M10 screws are also supplied. The time to assemble the plasma to the wall is 5 minutes.

Also available in:

- **Grey (Cod: 05806)**
