Cage made up of a single welded body of iron pipes, the structure is extremely resistant and guarantees perfect fixing of the support in the case of ceiling or wall installation; in landscape, portrait or floor projection.

Thanks to a special pin system, it is possible to stack several cages together, while still guaranteeing the independent calibration of each projector.

The micrometric adjustment on the 3 rotation axes takes place by means of special knobs or ratchet wrenches, thus obtaining the perfect centering and perpendicularity of the lens with respect to the projection surface, in order to improve the focus, the definition of the image or saving on the power of the projector.

FLIGHT CASE:

- 22841: normal FLIGHT CASE with standard accessory drawer 40x17x8 [cm]
- 22851: FLIGHT CASE with additional side container (depth 15 cm) without divider
- 22827: OPTIONAL PARTITION, possibly to be ordered together with code 22851
