electrical insulation projector	YES

Categories: Advanced Kalibration Systems, Matrix, Nekst

Innovative cage for professional projectors

**Compatibility:*

DLP A 1 CHIP
LCD > 10.000 LM
LCD < 10.000 LM

Features:
- The cage allows the use of clamps directly in its structure, facilitating installation and speed of application
- The calibration system is given by the dedicated KITE system
- The system allows micrometric and calibrated adjustment in all 3 axes and calibrated rotation
- The Kite can also be removed using innovative captive screws

- The system can also be used without a cage to allow quicker installation or with the use of special lenses such as ultrashort lenses
- The kite can also be moved inside the cage allowing the adjustment of the zoom or center of gravity
- The cage also has a system of adjustable feet which allows for easy projection even when standing
- The "stacking" hooking system also allows you to position the projectors in stacking with each other
- The stacking system can be both in landscape but also in portrait or floor using the stacking systems and feet
- The shape of the cage also allows for ease of maneuvering and maintenance of the projector itself
- The cage can also be used in stacking with just another kite, thus allowing a faster and more economical installation
