packaging	290 x 290 _ h2020 [mm]

Categories: Kalibro, Kite - Falcon, Unika

It is a telescopic pole with fixed extension distances and length between 200 and 350 cm.

It can be either fastened to a truss with 2 Clamps (not included) or to the ceiling.

After fastening the telescopic pole to the truss or ceiling, it necessary to fix the plate with standard Euromet fastening to the cage, which is then attached to the pole with practical safety pin system.

Once this has been done, it is possible to turn the cage freely (by 360°) to reach the desired angle and fasten it with two grub screws.

Compatibility: all EUROMET products with standard connection

Certification IMQ: EN 62368-1:2014+A11:2017 clause 8.7
