Categories: Educational Video Projector, Video Projector Mounts

Table mount for Epson projector
This system makes it possible to install the projector vertically and to fasten it to the table.
This will enable stable and precise projection straight onto the table, thus turning it into an interactive surface to work with students.
Thanks to the mount, it is possible to adjust height on both points so to perfectly centre the image based on the table size
The structure is perfectly round, and this confers full safety, while the system remains stable, efficient and sturdy, like all Euromet products.
