Inclinazione minima	5°
Standard attack	SI
Dimension	190 x 270 _ 115 [mm]
packaging	210 x 280 _ h130 [mm]

Categories: Flat Panel Mounts, Matrix

It is an accessory made up of 2 plates hinged together which allow the inclination of the support up to a maximum of 45° with minimum clicks of 5°.
It has a very practical and safe locking system which makes it extremely simple to use.

It has a standard connection on both inclined faces, which means that it can be mounted between a cage and an optional installation (on a trellis, wall, ceiling) or it can be inserted in a more complex system of optionals (rotation, tilting , sliding, etc.) by virtue of the standard attachment compatible with every EUROMET product.
In this way it is possible to have a customized final product, using standard products in any case.

Compatibility: All EUROMET products with standard connection

Certification IMQ: EN 62368-1:2014+A11:2017 clause 8.7
