Categories: Flat Panel Ground Mounts, Flat Panel Mounts

Is a monitor cart for a large screen. The size is medium which covers up to VESA 1400*600. Color: white.
Cable management available on both legs. Opportunity to integrate video conference systems. Opportunity of positioning the screen at different heights up to 32 cm. Maximum flexibility along the horizontal axis to position the monitor. The feet of the cart are patented which grants several features.
Features: Solves the problem of the bulkiness of office carts with large monitors, which take up a lot of space. Therefore, EUROMET has created and patented the new SIGMA leg system. This system allows the cart legs to be safely moved and shortened or lengthened as needed, whether the cart is in the center, being transported, or left open. Additionally, the rear legs can also be folded as needed, for example, to place it against a wall.
