MAX LOAD	150 kg
DIAGONAL OF THE MONITOR	up to 85”
VESA	up to 600-400
Material	Iron-Aluminum
Color	Grey

Categories: Flat Panel Mounts, Motorized Stand

Our motorized LIFT system is a simple, elegant and functional wheeled stand.
Easy to transport and install even in locations with poor access, since it is a **modular product** (wheeled stand – motorized rack – bracket).
The wheeled stand has a low, robust and beautifully designed shape. **Easy to move, also thanks to its robust and ergonomic wheels, easy to fix any time with their brakes.**
The motorized rack makes this product suitable for people with different heights and is equipped with hidden cables connecting the back of the screen with the floor, in order to make the external structure clean.
The monitor fastening system has multiple centre-to-centre distances for a further bracket adjustment – a few centimetres upwards or downwards - and it consists of a bent plate with back opening to insert special tools, making cable connections easier thanks to the wide space available (a safety cover with key-lock is also available on demand).
The standard bracket has a 800*600 VESA, but also an optional one is available with 1200*800 VESA.
To complete its wide range of functions, LIFT is also compatible with a telescopic camera support or can be integrated with plexiglass shelves.
