The SLIDE MAXI STAND is designed to support very large Videos and Monitors, up to 100″ thanks to its rectangular base with dimensions 1000x700.
A robust and enhanced structure that maintains a modern and innovative design.
The wide base includes a system of handles that support the entire structure in maximum stability. The handles are removable and therefore can be removed as needed so as to also leave the surface linear and unobstructed.
The cable passage is inside the structure so as to leave the structure clean and the cables safe.
SLIDE MAXI STAND features a millimeter height monitor adjustment system.
This same adjustment system also allows the application of all the accessories of the slide line, such as camera supports, mini PCs, second screens, both front and rear and both above and below the monitor.
