Max dimension	192x192x180 mm
Tilt angle	up to 30°
Swivel	360°
Ship weight box 1	3,2 kg
Fixing screws	M6 M3 M4 M5

Categories: Arakno, Video Projector Mounts

Arakno is a universal professional compact and modular support system, designed to safely hold large projectors with stability over time, and is compatible with most projectors manufactured by the best brands.
It offers the opportunity to perform our patented **micro-metric adjustment on 3 axes, thus enabling high-precision image setting for perfect image stability over time.**
All of this is possible thanks to the integrated knobs for a quick and easy adjustment without any additional special tool.
Adjusting is also easy for very heavy and large projectors installed with a wide projection angle: it goes with a standard socket-head wrench.
Connecting and removing is easy thanks to the quick-coupling system, making it possible to combine a wide range of accessories, such as extensions and adapters for tilted floor-projecting positions and truss installations.
Its stainless steel and brass are furthermore less prone to oxidation, if compared to other materials, and make it perfect for outdoor installations too.
100% Made-in-Italy support manufactured with top-quality first-choice materials, based on a high-precision manufacturing process and a thorough quality check.

Full-Black Arakno has an entirely black core structure to blend the system even more with the ceiling, thus meeting any installation and aesthetic requirements.
