TECN-OPERA MONITOR TROLLEY

SKU: 26111

Material	Aluminum, Iron
Net weight	71 kg
Gross Weight	90 kg
MAX LOAD	90 Kg
DIAGONAL OF THE MONITOR	90″
VESA	800×600
Color	White
Treatments	Powder coated
Usable Height	1420 mm (Centre line of monitor form the floor)

Categories: Flat Panel Ground Mounts, Flat Panel Mounts

The TECNOPERA wheeled monitor and touch screen stand system features both the innovative foldable trolley designed by Euromet and the manual monitor tilting system based on the patented Euromet double turn system. Thanks to these two innovative solutions, the stand allows maximum convenience of use in any environment by reducing the footprint of the base and tilting the monitor from the whiteboard position, 90°, up to the table solution parallel to the floor and all other stable and easy-to-obtain inclinations, such as 30°, 45° 60° and all others in between. The base can be converted from a wheeled stand into a fixed stand, reducing the floor space.
In addition, the rear part of the base can be fully raised, allowing the board to be brought completely close to the wall once it has been securely mounted.
As with all opera trolleys and stands, the Tecnopera version can be fitted with camera and sound bars, either above or below the monitor.
The version with the top elements can also be tilted together with the monitor itself. There is also a designer rack on which both the sound bar and the camera can be placed, and inside which important hardware components can be combined, both with and without the Paso rack.
