Categories: Flat Panel Ground Mounts, Flat Panel Mounts, Turn

The TURN line of trolleys, ideal for monitors and interactive whiteboards with 90 ° rotation system, is extended by this monitor stand with wheels in the shape of a tripod.

The TURN DELTA becomes MAXI supporting screens up to 105 inches and very heavy weights.
The rotation system can also count on the optional safety lock, in case of movement.
The support is universal and can be used for any interactive whiteboard or screen, both in portrait and landscape position.
Like the basic model, it has high stability and safety in movement and transport, with a minimum footprint. In addition, it has a large shelf and integrates a camera support and videoconferencing system.
Several preset positions are available: central, top, rear, with a telescopic adjustment or placed at three quarters.
In the latter case, the camera can be inserted at a correct height, above or below the monitor, without being covered or interrupted by rotation.
The possibility of closing the feet reduces the overall dimensions of the support to a minimum when not in use or moved.
They also have a system of internal cable glands that protects, distances and hides the various connection cables, both

of the monitors and of the applied instrumentation.
The wheels are easily lockable and can be replaced to transform the trolley into a stand.

It is ideal for any type of Touch Screen, in order to develop ideas, monitor and share projects.
Designed for offices, architects, designers and creatives, digital and marketing agencies, meeting rooms, classrooms, television studios.
